Your Comments:

I would encourage the EPA to move forward with the plan to clean-up the entire Lower Willamette River system. Strategically working from the upper (most up-river portion) and work your way down-river to eliminate the potential for re-contamination. I would also encourage EPA to use water quality monitoring data buoys as a form of providing live information regarding water quality for EPA and Oregon DEQ for contractor compliance with permitting agencies. Let get the river clean-up started in 2017!

We have an obligation to our children to leave the lower Willamette River in better condition then we have it now. Let's not burden our children and leave the environment cleaner.

Thanks,

(b) (6)
